Distek, Inc. Receives CE, ETL, and FCC Certifications on New Dissolution Instruments

North Brunswick, NJ – Distek, Inc., an industry leader in dissolution testing products and validation services, is pleased to announce the successful CE, ETL, and FCC certifications of the symphony 7100, Model 2500, and TCS-0500 thermocirculator. These certifications, an industry standard, guarantee consumers that the product conforms to essential requirements of performance and safety.

Distek also received the CE and FCC certification on the new Dosage Delivery System (DDS).

The CE certification confirms the product meets essential requirements to be sold on the open market in Europe. The FCC certification is comparable to the CE certification but is applicable on products sold in the United States. The ETL mark certifies a product conforms to electrical product safety standards.

“Each of Distek’s instruments are designed, developed, and manufactured to meet all necessary industry standards,” says Jeff Brinker, Vice President - Engineering, Distek, Inc. “These certifications are a testament to the success of our process and products.”

For further information on this or any of Distek’s industry leading dissolution products and validation services contact your local representative, Distek’s Headquarters at T:+1 732 422 7585, E: info@distekinc.com or visit www.distekinc.com.
